SUMMARY

Development Lead and Backend Engineer with 9 years of hands-on experience building and shipping production systems across FinTech, Legal SaaS, and enterprise CX domains. Track record of operating as both a principal backend engineer and team lead — architecting systems from scratch, owning end-to-end delivery, and mentoring teams while staying deeply involved in code. Proficient in the Java/Spring ecosystem, with expanding expertise in Generative AI and agentic application development — including RAG, agentic search, AI agents and workflows, Model Context Protocol (MCP), Claude API, and Google ADK (Java).

WORK EXPERIENCE

Talentica Software, Pune, Maharashtra, India Aug 2019 – Present

Development Lead

May 2024 – Present

JuriNex — Multi-tenant Legal SaaS Platform (Sep 2025 – Present)

Multi-tenant legal SaaS platform for law firms and solo practitioners, with AI-powered workflows for legal research and case/document management.

- Led a team of 7 as Tech Lead and primary Java backend engineer — built and owned Java microservices including RESTful APIs, data models, and third-party integrations for a scalable multi-tenant legal SaaS platform.
- Built and integrated the Razorpay payment gateway to handle subscription management, billing cycles, and secure transaction processing — a core revenue-enabling feature of the platform.
- Worked directly with clients to gather requirements and translate business needs into technical solutions, driving architecture decisions and ensuring alignment with product objectives.
- Led sprint planning, task breakdown, and end-to-end delivery; maintained code quality through structured reviews and mentoring.

Tech Stack: Java, Spring Boot, Postgres, RabbitMQ, GCP, Razorpay

VistaXM — Customer Experience Platform (May 2024 – Sep 2025)

CX-as-a-service solution helping B2B companies increase conversion, improve expansion, and reduce churn.

- Served as hands-on Tech Lead and primary backend engineer — architected and built core backend modules and RESTful APIs while leading a team of 7 developers.
- Architected the backend using Spring Modulith for clean module boundaries and implemented Spring Security for RBAC and authorisation, improving maintainability and platform security.
- Led sprint planning, task breakdown, and delivery; maintained code quality through regular reviews and mentoring of junior developers.

Tech Stack: Java, Spring Boot, Spring Modulith, Spring Security, GraphQL

Software Engineer I3

Dec 2021 – Apr 2024

FinOptSys — Platform for P2P Financing, Securities Lending & Collateral Optimisation

- Developed a feature that enriched portfolio documents, significantly reducing errors and improving data accuracy by fetching and integrating market security data from an external system via Kafka.

- Implemented a margin analysis feature by integrating with an OAuth2-secured external service, enhancing decision-making efficiency for trading activities.
- Optimised database queries and caching strategies, resulting in improved platform performance.
- Mentored junior developers on code quality and design principles.

Tech Stack: Java, Spring Boot, Apache Kafka, OAuth2, GraphQL

Software Engineer I2

May 2020 – Dec 2021

FinOptSys — Platform for P2P Financing, Securities Lending & Collateral Optimisation

- Developed a reliable backend service for automated email notifications, ensuring timely and event-driven communication with users.
- Created the Availabilities & Needs module using Spring State Machine, optimising borrow trade processes.
- Implemented algorithms for efficient matching of counterparties, significantly improving trade speed and accuracy.

Software Engineer I1

Aug 2019 – May 2020

FinOptSys — Platform for P2P Financing, Securities Lending & Collateral Optimisation

- Contributed to backend feature development, testing and deployment.
- Contributed to frontend development using JavaScript, React, and Redux during the project's initial phases.

Publicis Sapient, Gurgaon, India

Oct 2017 – Aug 2019

Associate Technology

Oct 2017 – Aug 2019

Glencore — Core Trade Project (FinTech)

- Resolved critical issues identified by SonarQube across the Glencore Core Trade Project codebase, leading to a notable improvement in code quality and software reliability.

Tech Stack: Java, MongoDB, GraphQL, React JS

SKILLS

Languages & Frameworks: Java, Spring Boot, Spring Modulith, Spring Security, Spring AI, Spring State Machine, Microservices, JPA, Hibernate, GraphQL

Messaging & Databases: Apache Kafka, RabbitMQ, Redis, PostgreSQL

Cloud & DevOps: AWS, GCP, Docker

Tools & Practices: OAuth2, SonarQube, Razorpay, Agile/Scrum, System Design, Domain-Driven Design

Generative AI & Agentic Development: RAG, Agentic Search, AI Agents & Workflows, Model Context Protocol (MCP), Claude API, Google ADK (Java)

EDUCATION

Bachelor of Engineering – Electronics and Communications

2013 – 2017

Birla Institute of Technology, Mesra

CGPA: 8.84 / 10

CERTIFICATIONS

- Google AI Essentials (Aug 2024)
- Claude Certified Architect – Foundations, Anthropic (Sep 2026)
